MULTIDISCIPLINARITY IN THE BREAST CENTER

Letter of Welcome

Dear Colleagues,

We are happy to welcome you to the fifth edition of the International Congress of Breast Disease Centers which will take place in Antwerp. All the previous editions were in Paris. The origin of the congress goes to 2010 when Dr. Marc Espié of the Hôpital Saint Louis invited the founding members to come to Paris and discuss about a new kind of congress, dedicated to organization and quality aspects of Breast Centers.

After the 2nd International Congress of Breast Disease Centres - Paris, February 2012 following statement was approved by the Chairmen of: ISS/SIS (International School of Senology/ Senologic International Society), NAPBC (National Accreditation Program of Breast centers, USA), EUSOMA (European Society of Breast Specialists) and endorsed by the President of UICC (Union for International Cancer Control):

“All women across the world should have access to fully equipped, quality assured, dedicated Breast Centers/Units, that provide competent and comprehensive care”.

During the last editions we receive also the visit and support of Mr. Y. Leterme as Deputy Secretary General of the OECD and Prof. K. Maruszewski, director JRC (European Commission).

In 2013 the aims of the congress were further discussed and besides to work on a World platform for breast centers without frontiers much emphasis is now placed on multidisciplinary care, quality management and economic issues.

This year we are extremely grateful for the more than sixty world experts, coming from 15 countries and four continents who accepted to discuss different aspects of Breast Multidisciplinary Care. The president of EUSOMA, ECCO, ESTRO, Breast Centers Network, NAPBC USA and the General Director of SIS agreed to come and speak during the Antwerp edition. We also especially want to thank the city of Antwerp and all the members of the executive and local organizing committee for their commitment and support.

MULTIDISCIPLINARITY IN THE BREAST CENTER

Letter of Welcome by the city of Antwerp
5th International Congress of Breast Disease Centers

Dear Madam, Dear Sir,

I welcome you most heartedly to my city, the city of Antwerp, for the 5th International Congress of Breast Disease Centers.

The best way to describe Antwerp is a small city that has a larger than life attitude. Mixing the old and new, the historic and the modern, is a knack that Antwerp displays with breathtaking panache. Once you have visited it, it will stay on your radar as a place with a heart of diamond. Literally. The city is a girl's best friend as it is the center of business when it comes to anything having to do with diamonds, the open diamond market in Antwerp consumes the vast majority of all rough, polished, and industrial diamonds in the world.

The street names of Antwerp's dockside speak of a history of trade by sea: Nassau, Madras, Riga, Naples, London, Bordeaux. Now the old brick warehouses that once received cargoes of cane sugar, spices, furs, rice, cloth and wine are becoming some of the city's most desirable Antwerp residential properties. Antwerp is still an important international cargo port, the second largest in Europe. The tiny city housing roughly half a million people is an incredible economic force, being the 7th largest port in the world.

The diversity of Antwerp is something to behold with many different people from all walks of life. There is large presence of Jews, Indians, Muslims, Chinese, Turks, and Africans. Antwerp also happens to be known for its fashion prowess, Europeans come to Antwerp to find many top designers that you wouldn't expect to find here. The Royal Academy of Fine Arts is luring top prospective fashion students from around the world and instead of taking their talents to New York or Paris, they are deciding to stay in Antwerp. You will stumble upon many top designers and international known artists.

It all comes together in one person that perfectly embodies what Antwerp is all about: polyglot, painter, entrepreneur, manager, architect, diplomat, antique collector, fashion icon - Peter Paul Rubens. As Sir Anthony Van Dyck and all other famous citizens after him he is known for one personal trait: pride. The inhabitants of Antwerp are locally nicknamed Sinjoren, after the Spanish honorific señor or French seigneur, "lord". It refers to the leading Spanish noblemen who ruled the city during the 17th century

The insatiable appetite of the Belgian people to provide nothing but the best combination of quality of living has elevated the city as a great place to visit, live, shop, eat, drink and fall in love with.

We not only welcome you to our magnificent city, but we also invite you to a reception in the Town Hall for the participants and the accompanying persons of the 5th International Congress of Breast Disease Centers. On Friday morning we have planned a City Tour with guide, and on Saturday you will be invited to a fashion, shopping and chocolate tour through Antwerp,

Welcome to my city. Welcome to Antwerp,

Philip Heylen,
Vice Mayor for Culture, Economy, City Maintenance and Property Management

MULTIDISCIPLINARITY IN THE BREAST CENTER

PROGRAM STRUCTURE

TARGET AUDIENCE

The Conference is a forum for physicians and health professionals with special expertise or interest in Surgery, Gynecology, Oncology, Radiotherapy, Radiology, Quality Management and Multidisciplinary care. Advances in those fields will be highlighted through the presentation of scientific research and clinical applications, daily practice and management experience. Within each theme, the program committee has identified several important issues in the area.

WORKSHOPS

This year we have organized several pre-congress workshops that enable to better cover the multidisciplinary of the congress.

SCIENTIFIC SESSIONS

The scientific sessions will begin with introductory notes by the session chairs, followed by presentations by invited speakers or selected abstracts for oral delivery. The sessions will include a keynote address, summary presentations, review talks, emerging research, presentations and new data on various topics which will provide broad coverage of the scientific spectrum and ensure that everyone will find topics of interest. The overall program includes 12 scientific sessions.

CALL FOR FREE PAPERS

Abstracts for oral and poster communications should be sent only by e-mail : congres@eska.fr
Mandatory deadline for receipt of abstracts :
January 16, 2015.

Please follow the frame available on :
www.congres.eska.fr

For any information please contact us by e-mail.
Only the abstracts received on time will be considered.
Proposals for contributed papers are subject to approval by the Scientific Committee.
Abstracts of free papers will be published in the next issue of the International Journal of Breast Disease Centers.
