- Docteur Marc ESPIÉ, Président du Congrès
- Docteur Mauricio MAGALHÃES COSTA, Président de la Fédération Latino Américaine de Sénologie
- Madame Léa Maria AARÃO REIS
- Professeur Jean TRÉDANIEL, Université Paris Descartes

Lancement le vendredi 8 février 2013 de l'ouvrage *Plus de 100 questions sur vos seins* à 12h45

« Plus de cent questions sur vos seins – Santé et beauté » est un best seller international, il est traduit dans de nombreuses langues et présenté sous la forme d'un dialogue entre les médecins et les femmes. Rédigé par le Professeur Brésilien Mauricio Magalhães Costa, un expert mondialement reconnu. En consultant l'ouvrage, la lectrice – de tout âge et de toute formation – pourra dissiper les principaux doutes qu'elle a sur la bonne santé de ses seins, les précautions à prendre et les traitements des maladies, dont le Cancer... Écrit dans un langage simple et accessible par un spécialiste internationalement reconnu, ce livre sera utile à toutes les femmes : il oriente les jeunes adolescentes qui traversent la période si sensible de la puberté, il dissipe les éventuelles appréhensions des futures mamans et rassure les femmes aux prises avec la ménopause et les traitements hormonaux. « Plus de cent questions sur vos seins – Santé et beauté » exalte la beauté des seins, symbole suprême de la sexualité féminine. L'ouvrage met l'accent sur l'importance des examens préventifs, décrit les traitements et les recours de pointe utilisés dans la lutte contre le cancer du sein. Ayez l'ouvrage toujours à portée de main, de préférence sur votre table de chevet...

Lancement le vendredi 8 février 2013 de l'ouvrage *Les médicaments des cancers* à 13h15

Qu'y a-t-il de commun entre la doxorubicine et l'adriamycine ? Pourquoi les dérivés du platine ont-ils des indications si différentes ? Les anticorps monoclonaux ont-ils évincé les cytotoxiques ? Qu'est-ce qu'un antibiotique anticancéreux ? C'est l'objet de ce livre que de répondre à ces questions et à toutes celles que soulève le côtoiement des médicaments des cancers. Pour cela, il fallait commencer par les classer les uns par rapport aux autres. Chaque produit est ensuite envisagé sous l'angle de ses indications officielles, validée par une Autorisation de Mise sur le Marché, puis de sa posologie, de son mode d'administration et des précautions qu'il est nécessaire de suivre avant de l'utiliser, des éventuelles résistances qu'il peut susciter et, enfin, des effets indésirables qu'il peut provoquer. Alors que les traitements des cancers évoluent quasi quotidiennement, ce livre a pour ambition de permettre à un vaste public, spécialisé ou non, de naviguer plus aisément dans les méandres de ces différentes classes médicamenteuses. L'édition 2013 fera l'objet d'une mise à jour annuelle et vous pouvez réserver l'édition 2014.
